**EXAMINER'S AMENDMENT**

*Amdt / pnp*

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

- In claim 1, on line 5, "first though" changed to ~~first through~~✓;
- In claim 9, on line 5, deleted "the top can element"✓;
- In claim 14, on line 1, changed "claim 14" to ~~claim 9~~✓; deleted "wherein" and inserted ~~further comprises the~~✓;
- In claim 15, on line 1, changed "claim 15" to ~~claim 14~~✓; and
- In claim 16, on line 1, changed "claim 16" to ~~claim 9~~✓; deleted "wherein" and inserted ~~further comprises~~✓.

**REASON FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance: the claims are allowable over prior art of record, because none of the references in alone or in combination discloses:

**A factory-settable optical subassembly for receiving a ferrule-held optical fiber, for use in an optical transceiver module, comprising:**

- an optoelectronic converter having an opening for passage of light;

Art Unit: 2874

- a top can element attachable to the optoelectronic converter and having a first through hole and a second through hole, the first through hole and the second through hole being in communication with each other; and

- a positioning element having a third through hole and the positioning element being received in the second through hole;

wherein the first through hole, the second through hole, the third through hole and the opening of the optoelectronic converter are arranged coaxially, and the positioning element can be moved along the axis of the second through hole and fixed in position such that, when the ferrule-held optical fiber is received through the first through hole and abuts against the positioning element, an end of the optical fiber will be at a proper focal distance from the optoelectronic converter to transmit a desired wavelength of light emitted by the optoelectronic converter at a maximum efficiency, as discloses in claims 1, 9 and 17.

The underline limitations are critically, since the device is improved: obtained different wavelengths of light are transmitted from the laser to the optical fiber with maximum optical power; reduced the damaged of the lens and degraded optical fiber during adjustment.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
